

THE NEW GENERATION

TECDATA ULTRA - MAX

THE BEST WAY TO
VEHICLE DIAGNOSTICS

With the Combi Start Action package you get the TECDATA DIAGNOSTIC SCANNER ULTRA-MAX with automatic updating during 3 years along with an attractive discount.

COMPATIBLE WITH:

Cars

Trucks

Generic EOBD / OBDII

IMPROVE THE PERFORMANCE OF YOUR WORKSHOP WITH THE DIAGNOSTIC SCANNER TECDATA ULTRA-MAX

EXTENSIVE

1. This computer controlled scanner has been developed to execute all diagnostic applications such as reading out ABS and ESP, airbags, immobilizer, automatic transmission, resetting service indicator, reading and deleting trouble codes, realizing live-data in real time, activation of components, execution of basic settings, coding control units, testing of actuators etc

2. An automatic scan indicates immediately which systems are present.

A special "Test-All" function to read out all the control units is also available and you can obtain direct access to the desired controllers.

SMART

3. The Ultra Max is equipped with an intelligent flight recorder. During a test drive selected parameters can be recorded in real time on a memory card without the need of a computer. During the test you can mark an error to investigate it specifically later on.

4. The SD memory card drive enables you to record data during hours which can be important for errors that do not occur constantly but from time to time.
5. A multi-color indicator on the scanner uses different colors to indicate the communication status and the battery voltage.

HANDY

6. The special LED light on the diagnostic connector is very handy in order to locate and connect it to the EOBD plug.

7. A built in antenna ensures an optimal connection.
8. Every Ultra Max diagnostic scanner is delivered with a Bluetooth kit so that you have a wireless connection between the scanner and your computer. At the same time you can use the standard delivered USB as well.

ACTUAL

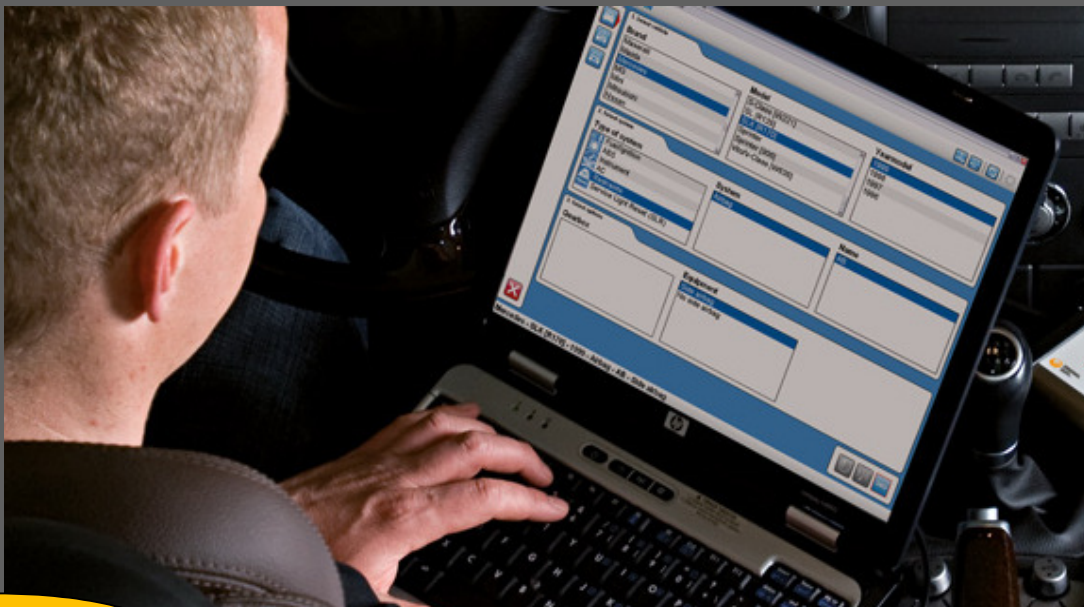

9. Constant software development and further expansion of the vehicle database.
10. Automatic updating: the software remains operational and is actualised till 3 times a year with affordable updates.

A beneficial Combi start action package includes the delivery of the scanner with automatic updating during 3 years and an attractive discount.

11. User friendly: after starting the program a clear and easy menu appears with the car manufacturers, year of construction, models, engine codes, ... The program is very easy to work with, just follow the instructions indicated on the screen.

PRACTICAL

INVENTIVE

12. An ingenious lookup function enables you to select the vehicle by introducing the VIN number yourself or by automatic detection of the VIN number in one of the control units (ECU).
13. The software is multi-functional and can be easily upgraded for reading out trucks and trailers.
14. For older cars without EOBD/OBD II connector there are special cables and connectors available, either as a complete kit or separate.
15. Technical assistance via telephone, fax or e-mail.

TECDATA
